## INTRODUCTION

This bibliography is composed of studies, theses, and periodical articles from 1965 to 1975, done in the area of small schools and rural education.

The entries are alphabetically arranged and include details of publication, bibliographical access, and order number wherever possible. There are annotations for some entries.

The bibliography was compiled under the direction of Alan W. Jones of the Graduate School of Education, Bishop's University.

Suggestions for additions and corrections are most welcome.

Continuous Curriculum Development -- Rural School. Second Year Evaluation Report. Fairfield Community Schools, Goshen, Indiana, April 1969, 196 p. Spons. Agency, Office of Education (DHEW), Washington, D.C. Division of Plans and Supplementary Centers. Available in microfilm from the Canadian Teachers' Federation (#27, p. 5). Program development reevaluation procedures involving faculty, students, and community in a continuous curriculum development project are given in this second-year report of the Fairfield, Indiana, community schools. The report is divided into 6 sections:

1. The process of developing conceptually designed curricula.
2. The processes of the professional staff.
3. Analysis of professional growth.
4. Analysis of the administrator-teacher relationships
5. Dissemination process and cost.
6. The most significant change during the second project year.

Exhibits illustrating workshop activities, as well as statistical evaluations of the project's impact on teachers and students, are appended. The first year of this program, which is funded under Title III of the Elementary and Secondary Education Act, is reported in a related document, ED 021 665 (TL). (See ERIC, Vol. 4, I, Jan. 1969, p. 82 for abstract - very similar to above abstract.)

Education - Manitoba.

Burns, Margery. The Case for the Small Schools. Speech  
delivered before Minnesota Interim Commission on  
Education, April 1968, 25 p. Available from  
the Canadian Teachers' Federation in microfilm #14.  
A political writer presents the case for maintaining  
small schools in Minnesota and not entering into  
drastic consolidation of school districts as  
recommended by the Domain Report. Small school  
superintendents' replies to a survey, results of educational  
studies and reports, the work of small school projects,  
and quotations from prominent educators and other  
national figures are cited in pointing out the unique  
features of small schools. Flexibility in  
programming, an individualized approach to students,  
and an excellent teacher-student situation are among  
advantages discussed. It is concluded that in  
place of consolidation, local control should be  
maintained and the legislature should strengthen,  
encourage, and promote small schools. A bibliography  
and copy of superintendents' survey form concludes  
the document. (SW)

Rural Education -- Partners for Accountability: Legislators; School Boards; Administrators; Teachers; Parents; Community (or Citizens); Students. New Mexico State University, University Park. ERIC Clearinghouse on Rural Education and Small Schools. National Institute of Education (DHEW), Washington, D.C. Bureau No. BR-6-2469, Feb. 1975, 38 p.  
Defined as a concept which centers on planning educational needs at the local level, accountability is particularly feasible in small rural schools, since the number of people responsible for education needs is more readily manageable than the number found in urban areas. Designed to familiarize rural parents and other lay citizens with the concept and practice of accountability, this handbook defines the shared responsibilities of schools, legislators, school boards, school administrators, teachers, parents, community, and students. Primary responsibilities are defined as follows: Rural schools are accountable for keeping pace with the rapidly changing trends of rural life, preparing students for jobs within the community, for continuing education, or for urban transition. Legislators are accountable for state laws that provide funds for equal education. School boards are

accountable for keeping up with information relative to the spending of school funds and for maintaining communication channels. Administrators are accountable to the school board for district management and information dissemination. Teachers are accountable for knowing and presenting subject matter via suitable methods. Parents are accountable for the learning habits and attitudes of their children. Communities are accountable for educational involvement. Students are accountable for learning. (JC)
